organisation	LCD4		Version	1.0.0

DESCRIPTION

Objectif	Creating an extension for a type of combat game					
Génése	There are more and more games of type FPS etc and that become bigger and bigger. The creation of clans, teams generates needs for additional information that the gaming company does not give to the staffs of teams or clans. The objective of the extension would be to propose a synthesis of the characteristics of the players' equipment, their garage. The extension should be able to propose to the administrators to create pages of information for these members A simplified visualization for the clan and a visualization by members					
Explication	Configuring the type of information in the ACP for the forum administrator Entering information by the members of the fleet of its tanks View the clan data according to the rules defined by the administrator Visualize the data by players

Creation of the tank

- Set whether normal or premium
- Set the tank name
- Define the rank (value from 1 to 10)
- Define the type (CCP / TL / VCP / CC / CA)
- Associate image of type

Repeat until you decide that all tanks are created

Repeat the same config for the next family

Registration of the garage by the member

The user once identified on the forum will click on a link that will bring a menu
In a window

- 1 - Configure your garage
- 2 - view his garage
- 3 - View the top clan

Choice 1

The identitive member will have a record in connection with what the administrator will have created of style

	YES	NO	Preferred 6	Preferred 8	Preferred 10
Premium					
Char 1 (name, rank, state)		x			
Char 2	x				
Char 3		x	x		
Etc.					
Normal

In the forum PHPBB

Menu

- Create your tank garage
- Visualization of your tank garage

It is obvious that the member will have to register and log on the forum to be able to create his garage

IF create tank garage

the member choice family on clic under logo
Then the tree of the family will be created by the administrator, it will suffice that it chooses the tanks that it has.
It is assumed that we trust the member.
In any case, it will be seen after play if he has lied or if he is mistaken.

A table will suffice it is obvious that it may be complicated to create the same image as in the game
But we have three essential informations

The tank family
The level of the tank
The type of tank
